Subject: Mine Work Safety and Emergency Plan for Gold King Mine

Mr. Donovan

We spoke earlier today.

The document requested mine entry and emergency incident contact plan does exist and is with the On Scene Coordinator and Team at the site.

They are aware that the County Sheriff wants a copy of it and has been informed that we need to get it to the County Sheriff today. My understanding is that representatives at the CO Division of Homeland Security and Emergency Management also called the Sheriff's Office to confirm this.

Please call, or have the Sheriff's Office call if this does not occur by the end of the day.

Thank you for your notification on this matter.
